

**TITLE:** Access your Group Benefits using facial recognition on an iPhone X

**ONSCREEN TEXT:** Travis Dill, Group Benefits and Retirement Solutions, Marketing and Communications

**SCRIPT:**

Hi there, my name is Travis, and I'm at Marketing and Communications team here at Manulife.

Today, I'll show you how you can quickly and securely access your Groups Benefits Plan through an iPhone 10.

If your Face ID is not set up on your phone, here's how you do it.

Go to Settings; select Face ID & Passcode.

If asked, enter your passcode.

Tap "Set up Face ID", then position your face in front of your device and tap "Get Started".

Follow instructions to complete set up of Face ID and tap "Done".

Now you're ready to sign-in to Manulife Mobile using Face ID.

The first time you sign-in, you'll have to accept the Terms & Conditions and allow access to Face ID.

The next time you access Manulife Mobile, simply position your face in front of your phone's screen to sign-in and access your Groups benefits information.

This is one of many different ways you can access your benefits plan when you're on the move.

Health benefits for the way you live your life.
