

Don't let others put your benefits at risk.

Knowing what your service providers are claiming is important.

### The risk

Service providers can submit claims in your name for services you didn't have.

### The consequence

False or embellished claims increase the costs of benefits plans for your employer. This can result in fewer or even a loss of benefits for you. It's also against the law.

### What can you do?

Share your concerns. If something doesn't feel right about a claim, let us know!
